

## Flourish Survey

Helping Norfolk's children and young people to feel understood

**The Norfolk Flourish Survey 2024 was completed by over 9000 Children & Young People aged between 8 and 18 from across Norfolk.**

This is what has been done with all the information taken from your answers...

### How your answers were used:

#### 1. Planning for the future

Your feedback helped adults plan important projects across Norfolk, like improving SEND support, updating attendance plans, and shaping early-help services. It also helped leaders understand how young people are doing overall.

#### 2. Changing and creating services

Your views led to new health campaigns, vaping support, substance-information webpages, better youth work, healthier lifestyle programmes, and more support for young carers.

#### 3. Improving learning in schools

Schools used what you said to update lessons (like RSHE/PSHE), plan new topics, understand how students are feeling, and improve teacher training.

#### 4. Helping professionals understand your world

Your answers helped social workers, Youth Parliament, and other organisations understand what matters to young people and use that insight to make better decisions and apply for funding.

### What the professionals said about the information you gave them...

*"It has provided better insight into the perspectives of children and young people... this insight will be vital."*

*"Hugely valuable... it shows how children and young people's views need to shape what we do."*

*"The insights helped us focus on what matters most to young people—so our work is more relevant and effective."*

*"Really good to hear from such a range of young people. What's important to them isn't always what professionals expect."*

**Look out for updates about the next Flourish Survey and how you can get involved and share your voice!!**
