

# **Star Academy**

### Academy accounting software

The accounting and budgeting platform specifically developed for the education sector by school finance specialists with over 20 years experience.

- Developed by academy finance managers for academy finance managers
- Customisable to your trust
- Cloud-based available any time and anywhere
- Cost-effective
- Fully-compliant with DfE and ESFA requirements

## **Star Academy**

Star Academy is the result of collaboration between Educator Solutions, a not-for-profit organisation, and our group of academy stakeholders. The result is a fully-integrated, cost effective accounting and budgeting platform that specifically meets the needs of academies and MATs.

#### Meeting your needs flexibly

Star Academy enables you to carry out all the accounting and budgeting processes required of an academy. It gives you complete flexibility to customise your chart of accounts and apply a reporting framework that characterises how your trust operates. You can manage your supplier customer records to create orders, transactions, invoicing, receipts, payments and carry out reconciliations efficiently.

Star supports both single-academy trusts (SATs) and multi-academy trusts (MATs). MATs can produce reports on individual sites, a selection of sites or the entire trust with the ability to post journals across the various entities. MATs with a central finance function are able to control all of the finance operations on behalf of their schools or deploy certain accounting tasks to their schools. It's a totally flexible solution.

Key features include:

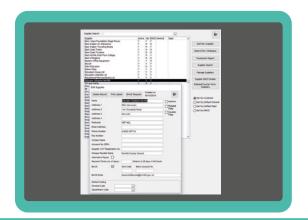

- Enhanced staff monitoring to ensure you keep on track with your budget
- Payroll import function saving time on manual entries
- Comprehensive and personalised set of reports

   meeting the needs of trustees, DfE, ESFA & EFA
- Asset register to ensure all assets are tracked in one place
- Budget planner software included
- Document storage facility
- Web portal enables access to ordering and reports with new features coming soon!
- Accessible on your laptop, smartphone and tablet wherever you are.

#### **Expert support included**

Annual subscription includes a dedicated helpline, user guides and a selection of e-learning courses included in the price – so no hidden costs. The technical and operational helpline support is provided by the developers and users of the system, so they really know all the details.

Because Educator Solutions is a not-for-profit organisation our focus is on helping you to provide the best education possible. We're able to bring Star Academy to you at a very cost-effective annual subscription rate. Our roadmap of future developments is informed by the academy stakeholder group and ensures that improvements continue to be made.

- Integrated Budget Planner Software Saving you time with creating manual budget spreadsheets as the system is updated for you
- Cashflow Forecast
- Advanced Management Account Reports
- Web Based Accounting Suite Currently cloud based in Access
- Monthly Accrual And Prepayment Posting
- Scan Prime Documents To The System
- Online Authorisation Of Orders
   & Transactions Can be set at different levels and turned on or off.

5

At every stage of development, myself and other end users have been involved, consulted and listened to via the STAR Academy Network Group which meets regularly to discuss developments and share ideas.

The end result is a user-friendly financial accounting software system which fully meets our needs and those of our Trustees and external auditors." Business Manager

STAR Accounts is used in all of our schools in The Yare Education Trust and is both very user friendly, easy to navigate and has scope to produce financial information to satisfy our requirements. The support we receive is prompt and positive, with a comprehensive online user guide easily accessible." Assistant School Business Manager
