

## List of Tree Surgeons on Norfolk County Council's Dynamic Purchasing System for the Provision of Tree Surgery Services

The following tree surgeons have been appointed to **Lot 1 (Tree Surgery Services)** of Norfolk County Council's Dynamic Purchasing System (DPS) for the Provision of Tree Surgery and Woodland and Forestry Maintenance Services. In being appointed they have demonstrated that they have the necessary skills, qualifications and insurances that the Council stated was necessary to become part of the DPS. The Council and Norfolk Tree and Landscape Officers Group (NOTaLOG) have also verified that work quality and work practices are in line with current industry standards (BS3998:2010 Tree Work – Recommendations). Please note that the companies on this list are **Tree Surgeons** and not tree consultants; however, some companies may also offer consultancy services but standards of work and insurance details for consultancy work have not been vetted as part of this framework. Where tree work is not being carried out under the Council's DPS agreement, the Council and NOTaLOG can take no responsibility for the quality of work carried out by any company listed.

\*Company is an Arboricultural Association Approved Contractor

♦Company employs one or more International Society of Arboriculture Certified Arborists

## Arboricultural Association Approved Contractors

The Arboricultural Association maintains a list of **Approved Contractors** that have been through a rigorous vetting programme run by the Association. Contractors are regularly assessed for their health and safety procedures, office and business practices and the quality of their tree work. The Arboricultural Association expects very high standards which restrict the number of successful applicants. Because of the irreversible nature of all operations concerning tree care these standards are carefully maintained by regular re-assessment of the contractors.

## ISA Certified Arborists

The International Society of Arboriculture Certified Arborist programme seeks to assess the technical knowledge of **individual arborists**. Certified Arborists have passed an exam covering all aspects of tree care and are expected to maintain their knowledge up to date through continuous professional development. Unlike the other schemes, which accredit companies, the ISA Certified Arborist scheme certifies individuals. Although Certified Arborists are competent tree specialists, the status says nothing about a company's business practices.

**Other:** There are other companies and individuals providing a professional service that choose not to be accredited by Norfolk County Council.
